

State Water Board Priorities

1. Review of every open case at least once per year.
2. Closure of cases that no longer require corrective action.
3. For existing cases, the need for continued expedited site investigation and cleanup at MTBE sites, especially those that threaten drinking water wells.
4. The need for valid data in GeoTracker, especially for open cases.
5. Compliance with GeoTracker Reporting Requirements.
6. Removal of Free Product within two years of discovery.
